

JOURNAL OF GRAPHIC ENGINEERING AND DESIGN

GUIDELINES FOR AUTHORS

All the sent manuscripts should be formatted according to the guidelines for the authors. The manuscripts should be sent in *.doc or *.docx (MS Word format) and PC formatted. The manuscripts are submitted to jged@uns.ac.rs. The language of the journal is British English and all text should be written according to it.

Formats and Styles

The manuscript should be max. 12 A4 pages and papers below 4 A4 pages shall be regarded as Short Communications and will not be published.

The text should be formatted with 10 pt Times, Figures and Tables in 10 pt Times italic.

Figures and pictures should be either in vector format (*.eps, *.ai, *.svg, etc.) or in high resolution bitmap format (min. 300 ppi) with preferably lossless formats (*.TIFF, *.BMP) or in JPEG with high quality settings.

Typed tables are not regarded as figures. They have to be numbered separately (Table 1, Table 2, etc) with all necessary text or comments placed above them. The authors should mark which author is the corresponding author whose email and contact address will be published. All equations should be numbered in brackets:

$$E = mc^2 \quad (1)$$

If the software code is presented in paper, if possible, place the code into a table.

The papers will be published in hardcopy and online, and all corresponding authors will receive a hardcopy of the issue in which is their paper published.

Funding

List funding sources before *References* chapter to facilitate compliance to funder's requirements. Example: This work was supported by the European Commission under the Horizon 2020 Marie Skłodowska-Curie Actions project "MAKERS: Smart Manufacturing for EU Growth and Prosperity" [grant agreement number xxxx, yyyy].

It is not necessary to include detailed descriptions on the program or type of grants and awards. When funding is from a block grant or other resources available to a university, college, or other research institution, submit the name of the institute or organization that provided the funding. If no funding has been provided for the research, please include the following sentence: "*This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.*"

Referencing

The references in text should be prepared in Harvard style (author, date). The reference list should be sorted in alphabetical order by author/editor. Please provide all the required elements in the references to your paper. Please pay particular attention to spelling, capitalization and punctuation.

Accuracy and completeness of references are the responsibilities of the author. Before submitting your article, please ensure you have checked your paper for any relevant references you may have missed.

It also implies to follow up the rules considering the number of authors:

- » one author (Novaković, 2001);
- » two authors (Novaković & Kašiković, 2001);
- » three authors (Novaković, Kašiković & Vladić, 2001);
- » four or more authors (Novaković et al., 2001).

If you cite a work which has the same author and was written in the same year as an earlier citation, than it should be cited as follows: (Novaković, 2008a; Novaković, 2008b).

Secondary references should be written as:

- » According to Novaković & Kašiković (2005) as cited by Vladić et al. (2008) most printing techniques

If a direct quote from a book, article, etc., then use single quotation marks and state the page number:

- » Novaković (2001) stated that the principle of direct printing techniques(p.12).

You should provide an in-text citation for any images, illustrations, photographs, diagrams, tables or figures that you reproduce in your work, and provide a full reference as with any other type of work.

They should be treated as direct quotes in that the author(s) should be acknowledged and page numbers shown; both text where the diagram is discussed or introduced, and in the caption you write for it:

- » In-text-Table illustrating checklist of information for common sources (Pears and Shields, 2008: p.22). or
- » 'Geological map of the easternmost region of São Nicolau' (Ramalho et al., 2010: p.532).

If you need to cite a piece of work which does not have an obvious author, you should use what is called a 'corporate' author (KBA, 2009).

When more than one publication by the same author is being used, in the reference list at the end of the paper they should be listed in date order beginning with the oldest published one.

When more than one publication is being cited in body text at once, list the publications in date order beginning with the oldest published and use semi-coma as separator: (Pal, 2001; Vladić et al., 2005; Novaković, 2008a; Novaković, 2008b; Novaković, 2010).

PHOTOGRAPH: ONLINE

You should provide an in-text citation for any images, illustrations, photographs, diagrams, tables or figures that you reproduce in your work, and provide a full reference as with any other type of work. If the photograph you want to reference is from a journal, book or other published work, use the appropriate layout from elsewhere in this list.

Name of photographer
(Year of publication)
Title of photograph (in italics)
Available from: URL
[Date of access]

JOURNAL ARTICLE: ONLINE/ELECTRONIC

Most online articles will have a DOI (Digital Object Identifier) and you should use this in your reference. The DOI is a permanent identifier provided by publishers so that the article can always be found. If there is no DOI then you should use the URL. Some lecturers will ask you to reference an online journal article as a print article, so always check your coursework guidance. To find the DOI, when you read an article online, check the article details as you will usually find it at the start of the article. For more help, contact your librarian. If you read the article in a full-text database service, such as Factiva or EBSCO, and do not have a DOI or direct URL to the article you should use the database URL.

Author
(Year of publication)
Title of journal article
Title of journal (this should be in italics)
Volume number. Issue number. Page numbers of the article (do not use 'p.' before the page numbers). Available from: URL or DOI
[Date of access]

JOURNAL ARTICLE: POSTPRINT/IN PRESS

If a journal article has been submitted to the peer review procedure and accepted for publication, but is not yet published in a specific journal issue, this is a postprint. These articles can be referred to as being 'In press'. You should be able to work out what type of article you have found using the information provided with the article. Journal publishers now assign DOIs to articles before they are published in a specific journal issue, so you can use the DOI provided for postprint / in press articles. This will ensure that the correct link for the article remains when it is moved to a specific journal issue. If you read a print journal article not yet published in a journal issue, follow the layout below, ignoring the online information required.

Author/s

(Year of writing)

Title of journal article

Title of journal (this should be in italics)

[Postprint/In press: Online]

Available from: URL or DOI

[Date of access]

JOURNAL ARTICLE: PREPRINT

It is likely you will find articles available online before they have been submitted to the peer review procedure and published in a journal. These articles are preprints and may be placed in an online repository or on a publisher's website (but not in a specific journal issue).

Author/s

(Year of writing)

Title of journal article

Submitted to/To be published in (if this information is with the article)

Title of journal (in italics)

Name of repository (in italics)

[Preprint]

Available from: URL (if available)

[Date of access]
